

HackPrep – Full Product Requirement Document (PRD)

1. Product Overview

Objective: Build an end-to-end hackathon operating system.

Core Flow: Discover → Team → Idea → Build → Pitch → Submit.

Target Users: Students, developers, designers, hackathon teams.

2. Authentication & Onboarding

Current: Google login only.

Missing: No user context.

Add: onboarding with role, skills, interests.

Impact: Personalization and recommendation accuracy.

3. Dashboard

Current: Displays activity.

Missing: No actionable direction.

Add: Quick actions, resume tasks, deadlines overview.

Impact: Guides user decisions.

4. Hackathon Discovery

Missing entirely.

Add: browse hackathons, filter by date, domain, rewards.

Impact: Entry point of entire product.

5. Team Formation

Missing entirely.

Add: find teammates, invite system, roles.

Impact: Core collaboration system.

6. Idea Exploration

Current: Search and compare.

Missing: Validation and feasibility.

Add: difficulty, tech stack, time estimation.

Impact: Better decision making.

7. Idea Lifecycle

Missing entirely.

Add: Idea → Shortlisted → Selected → In Progress → Completed → Submitted.

Impact: Structured workflow.

8. Workspace

Current: Basic tasks.

Missing: Full execution environment.

Add: Kanban board, deadlines, files, comments.

Impact: Real project execution.

9. Task Management

Add priorities, dependencies, deadlines.

Impact: Work tracking becomes structured.

10. Collaboration

Missing chat/comments.

Add: mentions, logs, discussion threads.

Impact: Reduces need for external tools.

11. File Management

Missing storage.

Add: upload files, folders, version control.

Impact: Centralized assets.

12. Resources

Current: Mixed resources.

Add: categories + search.

Impact: Improves usability.

13. AI Layer

Current: Limited.

Add: AI across idea, tasks, pitch.

Impact: Differentiation.

14. Pitch Builder

Current: Generate only.

Add: edit, preview, export.

Impact: Real usability.

15. Timeline

Missing.

Add: deadlines, countdown.

Impact: Time awareness.

16. Notifications

Missing logic.

Add: alerts for tasks, invites, deadlines.

Impact: Drives engagement.

17. Profile

Current: Basic.

Add: projects, history.

Impact: Credibility.

18. Submission System

Missing.

Add: submit repo, PPT, demo.

Impact: Completes workflow.

19. Integrations

Missing.

Add: GitHub, Figma, Drive.

Impact: Ecosystem compatibility.

20. Permissions

Missing.

Add: roles (admin/member).

Impact: Team control.
